Mr. Donald Ausborn
Hazard Control Technologies
150 Walter Way
Fayetteville, Georgia 30214

Dear Mr. Ausborn:

Thank you for providing training on the F-500 product. All of our personnel were very interested in the product and how quickly it extinguished and cooled the fire on the two evolutions. C platoon was so disappointed that you could not stay for the third day, that we had to take them back to the field and let them conduct the same evolutions with this product.

The following day we purchased 12 pails of the product from Ten-8 Fire Equipment in Bradenton. Within the first week of putting the product in service, we had a vehicle fire (Corvette) and a semi-tractor fire. Both vehicles were fully involved upon our arrival. As soon as the F-500 was applied, the black smoke turned white and the fire was extinguished with no radiant heat. We used minimal water and product on both incidents. The F-500 has done an excellent job for us.

Sincerely,

Bill Bowers
