**Subject:** Re:

Stan,

We have a small day-to-day budget, so would it be economically feasible to order onesies-twosies from HCT? I would like a quote for 8 5 gal. pails of F-500 delivered to the below address. Like you, I expound constantly on the virtues of this amazing product. Can't get over how great it works on all of our fires and spills! Seeing (and using) is believing. Bottom line, it works like nothing else we've tried, our water consumption on structures has been cut be 2/3's using F-500 at 0.5% to 1%.

I'll get off my soap box now.

Thank you for your help...
